

THOMAS BROWN

Senior Software Engineer | Charlotte, NC | 864.324.7107 | Thomas.brown1125@gmail.com

PROJECTS

Peace of Property – Property Management App | <https://peaceproperty.io>

2025 - present

- Solo-developed a full-stack property management platform for landlords, covering properties and units, lease lifecycle, rent collection, maintenance requests, expense tracking, and tenant/application management, with role-based dashboards for landlords and tenants.
- Tech Stack: .NET 9, React, and SQL Server; integrated Azure Blob Storage, Stripe, DocuSign (e-sign), Twilio/Azure Communication Services, and real-time updates via SignalR to support document storage, payments, lease signing, and notifications.
- AI / automation: Added AI-assisted features including an in-app copilot for summaries and actionable insights, OpenAI-powered lease preview generation, expense categorization, and background jobs that keep state deposit and late-fee law data current for lease compliance.
- Lease and compliance: Designed a configurable lease builder with template placeholders, AI-generated lease sections, and state-specific deposit and late-fee rules to keep lease terms aligned with local regulations.

EXPERIENCE

Senior Software Engineer

Nascent Technology | Charlotte, NC

2023 - present

- Lead development of Automated Gate Systems for major Intermodal port clients in an Agile environment.
- Architected and delivered solutions using .NET 8/9, React, Microservices, Winforms, and Window services. Drove adoption of modern tech stack improvements to enhance system performance and scalability.
- Promoted to Senior Engineer within 6 months based on delivery impact and leadership.
- Tech Stack: GoLang, ASP.NET, C#, .Net 8/9, VB.NET, MS SQL, React, Typescript, Microservices, Window Services, WinForms, Entity Framework

Azure Support Engineer

Microsoft | Charlotte, NC

2020 - 2023

- Provided advanced performance tuning and optimization for Azure App Services customers globally.
- Resolved complex issues related to app performance, availability, and scalability across cloud environments.
- Conducted root cause analysis (IIS, memory dumps, Azure diagnostics) to improve system health and reliability.

- Authored technical documentation to drive product and support improvements
- Designed and developed internal diagnostic and troubleshooting tools using .NET and Azure services to streamline root cause analysis.
- Tech Stack: Azure Services, App Services, IIS, .NET Core, C#, JavaScript, Node.js, Linux

Software Engineer

Nascent Technology | Charlotte, NC

2018 - 2020

- Designed and implemented Automated Gate Systems for key port clients (Port of San Juan, SC Ports Authority, Port of Virginia).
- Delivered systems that improved operational throughput and revenue for clients.
- Tech Stack: ASP.NET, C#, VB.NET, MS SQL, Microservices, Window Services, React, WinForms, Entity Framework

Web App Developer (Contract)

Marlo Holdings LLC | Charlotte, NC

2018 - 2019

- Built and optimized high-ranking websites using React and Next.js, with a focus on SEO performance
- Delivered responsive, SEO-friendly front-end solutions to improve client visibility and traffic
- Tech Stack: React, Next.js, JavaScript, HTML, CSS

CERTIFICATIONS

AI-900 Azure AI Fundamentals

- Microsoft Certified

AZ-900 Azure Fundamentals

- Microsoft Certified

Azure App Service Performance & Availability

- Microsoft Certified

EDUCATION

Coding Bootcamp | Full Stack Web Development

University of North Carolina Charlotte | NC

2018

- Modern fullstack development (React, Node, Mongo, SQL)

Bachelor's degree in Information Technology

Furman University | Greenville, SC

2016

- Data Structures & Algorithms, History of CS, .NET

SKILLS

Azure, Azure Cloud Architecture, Cloud Troubleshooting, Cloud Best Practices, Azure AI, ChatGPT, CursorAI, Azure OpenAI, Azure Devops, IIS 10, .Net 8/9, .Net Framework, Winforms, Window Services, REST API, C#, GoLang, Asp.Net, Vb.Net, JavaScript, Typescript, jQuery, HTML5, CSS3, SASS, Bootstrap,

React.js, Redux/Hooks/JSX, Node.js, Express.js, Next.js, MongoDB, MS SQL, MySQL, XML, JSON, MERN, Command Line, Git, Agile Methodologies, SOLID Principles.
